

Please do not mess up the Wisconsin No Call list. The proposal to allow previous business contacts to call us is an intrusion in our privacy. If we wanted to talk to them, we would call them.

The No Call list is already an 'opt-out' when in fact, being called should be an 'opt-in.' Don't make it worse.

The FCC needs to figure out if it works for the citizens of this country for private business interests. Too much of government is dictated by them now. Don't be another wimpy lackey for big money.
